

FOR IMMEDIATE RELEASE

MAY TRUCKING COMPANY ADDS 100 TRUCKS TO FLEET

100 Tractor Addition is a Reflection of May Trucking Company's Future Growth

01/01/2010 - Brooks, Oregon - May Trucking Company is adding 100 tractors to their existing company fleet over the next few months. 20 new Peterbilt 387 Aero cabs will deliver in March 2010 and continue through April. The following month, International Prostars will be rolling off of the production line and commence delivery. A total of 80 Prostars are currently scheduled to be delivered to May Trucking Company throughout the summer of 2010.

Brad Weathermon, VP of Operations at May Trucking Company, stated, "Everyone here is very excited for this growth and the impact it will have on our fleet. Not only because the trucks are brand new, which in itself is very exciting, but also because of the efficient type of engine in these trucks and our continued efforts to move towards a greener fleet."

The new 2010 trucks feature engines that have been recognized as fuel efficient and environmentally friendly by the Environmental Protection Agency's (EPA) SmartWay program, which establishes fuel-saving, low-emission specs for new Class 8 long-haul tractors. May Trucking Company has received EPA SmartWay's highest ranking for outstanding environmental performance.
